Product Manager XPR Readers

xprReaders

CONFIGURATION SOFTWARE FOR THE XPRO AND XSMART RANGES
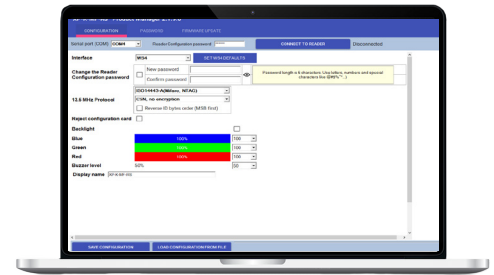

Product Manager

The **Product Manager XPR Readers** is a new user-friendly software designed to manage the Xpro and Xsmart readers.

You can set up the readers as well as update the firmware or make any new settings you would like to add or remove. The software is available in 7 languages and compatible with Windows operating systems
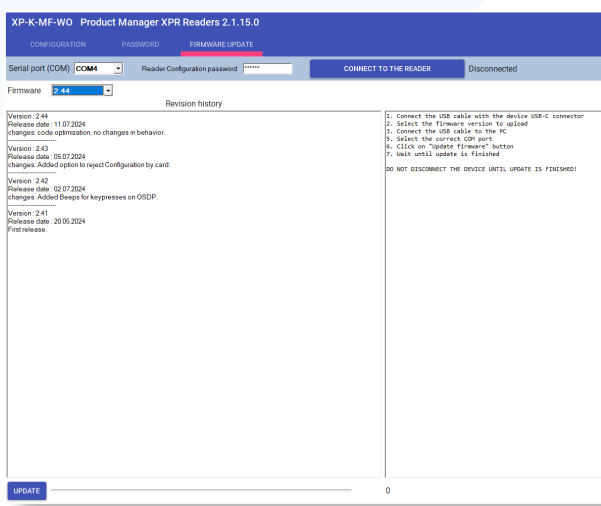

⌂ Software for Xpro and Xsmart readers

The new generation of access control readers has been developed to offer more possibilities with fewer references. One reader can combine different communication protocols (Wiegand, OSDP) and different technologies (EM, Mifare, Keypad, Bluetooth, etc...), besides being upgradable according to the customer's needs.
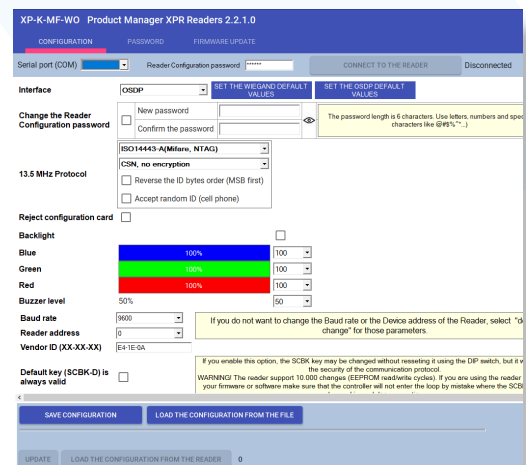

Thanks to the Product Manager XPR Readers software you can set up the configuration (communication protocols, technologies...) you desire for your readers, as well as update their firmware or the settings afterward if needed.

⌂ Main features

Firmware update

Once the reader is connected to the computer, you can check the latest firmware available for your reader, and it can be installed with some easy instructions.

Settings

Once the reader is connected, you can select the settings you desire for your XPR reader(s), such as the protocol, technology, card types, etc. You can also apply specific settings: OSDP, Wiegand, Templates, and Password.
